ABOUT

Branch Office Solution secures internet traffic branch to branch as well as between branches and data centres, headquarters and remote workers.

SD-WAN solution allows for organizations to enable cloud-delivered branches. Our vendors' Next Generation Firewall and LTE/5G router adapters work hand in hand to keep data secure and ensures optimal wireless routing connectivity for your office branch.

OUR OFFER

Managed and deployed by CCNA, we provide specialised consultation and customer centric design with the added support from the vendors.
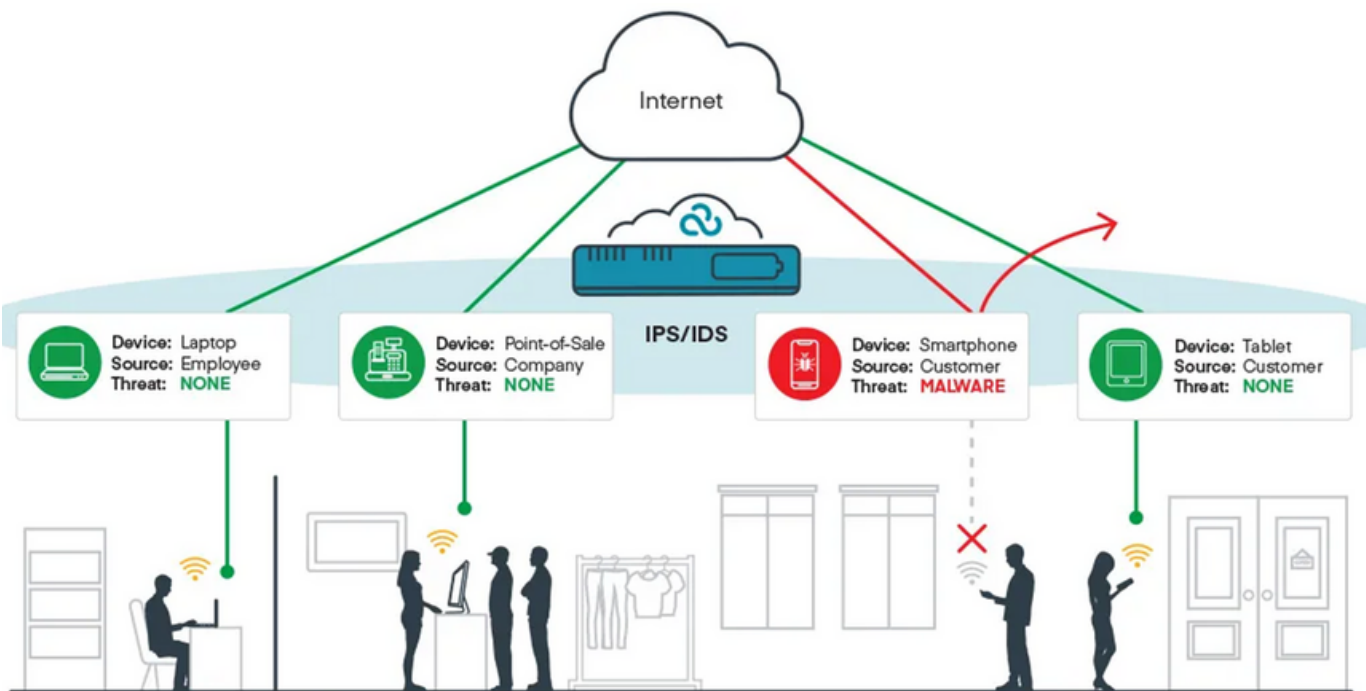

With CCNA's SD-WAN solution, our experienced team are here to provide ongoing support and management, from set up, performance reviews, SaaS optimization and cloud applications for users. Keep all data secure in transit and ensure proper access control - both critical to protecting an organization as a whole.

CCNA

BENEFITS & FEATURES

SD-WAN takes a distinct approach, managing the WAN through cloud-based management to help companies reduce costs and improve productivity and security.

HOW IT WORKS

Enhanced Secure Branch

- DNS Security
